

Skills

- **Programming Languages** : Javascript, HTML, CSS
- **Libraries and Frameworks** : React, Node.js
- **Tools** : MongoDB, MySQL, Git, postman, REST API

Experience

Software Engineer (React Developer)

Oct 2023 - Present

Infinite Computer Solutions

1. Built scalable, responsive web applications using React with modular, reusable components.
2. Integrated RESTful APIs built on Node.js, consuming MySQL-backed endpoints for reporting and dashboards.
3. Validated and debugged REST APIs using Postman, ensuring reliable request/response handling before frontend integration.
4. Designed low-level component architecture (interaction diagrams, module boundaries) to improve decoupling and maintainability.
5. Refactored duplicate UI logic into a shared component library, reducing code redundancy.
6. Participated in Agile ceremonies, code reviews, and sprint planning.

Tech: React, JavaScript, Node.js, MySQL, Postman, HTML5, CSS3, Git

Software Engineer (Front-End Developer)

Apr 2023 - Sep 2023

Capgemini

1. Migrated legacy JavaScript UI to modern React components, improving maintainability and reducing load time.
2. Collaborated with backend teams to consume MySQL-backed REST APIs for data-driven dashboards.
3. Created component-level LLD documentation (props, state, data flow) to guide development.
4. Improved UI performance by optimizing rendering and reducing heavy DOM operations.
5. Developed backend services using Express.js and integrated REST APIs.

Tech: React, JavaScript, HTML5, CSS3, MySQL

Software Engineer

Oct 2021 - Apr 2023

HCL

1. Developed frontend modules for Purchase Orders and Invoice Management systems using React.
2. Built and integrated backend services using Node.js and Express.js, connected to MongoDB and SQL databases.
3. Designed MongoDB schemas and optimized queries for ERP-related modules.
4. Validated backend APIs using Postman, reducing integration issues between frontend and backend.
5. Worked with modular, service-based backend architecture (microservice-style separation) enabling independent feature development.
6. Automated invoice printing and reporting using optimized SQL queries.

Tech: React, Node.js, MongoDB, SQL, Postman, HTML5, CSS3

Software Engineer (contract - client HCL)

Dec 2020 - Oct 2021

Collabera Pvt Ltd

1. Designed and delivered responsive, modular React UI components for 40+ client applications.
2. Improved application performance by ~30% through component reuse and optimized rendering.
3. Documented component APIs and small-scale LLD (data flow, module boundaries) to improve handover and scalability.
4. Applied UI/UX best practices for consistent user experiences across platforms.
5. Worked with microservices-based architecture, enabling independent service deployment and scalability.

Tech: React, JavaScript, HTML5, CSS3

Projects

Corona Virus tracker

<https://covid-19-tracker-10ae3.web.app/>

- COVID-19 Tracker — ReactJS | Chart.js | Material-UI | Firebase
- Built an interactive dashboard visualizing global and country-level COVID-19 statistics. Integrated live data from disease REST API and transformed it for charts and maps. Implemented interactive charts and map visualizations using Chart.js.
- Built and deployed a React-based COVID-19 tracker with an interactive world map, Chart.js visualizations, clickable info boxes/popups, and live data from disease.sh (Firebase).
- **Tech: React, REST APIs, Chart.js, JavaScript, HTML5, CSS3, Firebase**

Weather App

<https://global453.github.io/WeatherApp/>

- A simple weather application that shows real-time weather data using Weather API.
- Features - Search weather by city, Shows temperature, condition, and local time, Dynamic weather icons, Responsive design.
- **Tech Stack: HTML, CSS, JavaScript, Weather API**

KANBAN

https://global453.github.io/KANBAN_PROJECT/

- Developed a **Kanban-based task management web application**
- Implemented **drag-and-drop functionality** for task movement
- Designed **dynamic UI using JavaScript DOM manipulation**
- Enabled **local storage** for persistent task data
- Built **interactive task creation modal system**
- Organized workflow using **To Do, In Progress, Done columns**

Achievements

- Runner UP in technical fest at IIT BHU (2017)
- Represented my College in State level Basketball championship.

Education

Shri Ramswroop Memorial College Of Engineering and Managment
